

Triggers for a Mandatory Auditor's Report (MAR)

The triggers for mandatory audits under the *Contaminated Sites Act 2003* include:

- A property is deemed to be a “source site” by the DWER, with contamination from it affecting other properties;
- A Mandatory Auditor's Report is required to satisfy a planning or other statutory condition;
- A regulatory notice (e.g., investigation clean up or hazard abatement notice) is issued by the DWER for a property; and
- Where the DWER requests a MAR for a property with complex contamination issues.

Voluntary audits can be undertaken when a trigger for a mandatory audit is expected and/or to provide additional assurance and certainty for decision making by clients.
